Lesson 19

## Homework(Day 3) MIT/UCLA

Solve the one-step equations:

$x - 4 = 1$	$y + 3 = 9$
$3g = 15$	$\frac{r}{2} = 9$
$z + 5 = 6$	$4v = 20$
$k - 2 = 4$	$\frac{h}{5} = 1$

Topic: Inequality

## Homework Day 3

1. Which statement describes every number that is a solution to the inequality  $6t > 48$ ?
- A It has a value greater than 8.
  - B It has a value less than 8.
  - C It has a value equal to 8.
  - D Its value is 8 greater than 48.

2. Ava spent 3 hours yesterday practicing the piano. She is going to spend at least 3 hours practicing today. Which number line models the total amount of time Ava will practice piano in all?

3. Guests must be at least  $42\frac{1}{2}$  inches tall to go on an amusement park ride. Which inequality represents the heights of the guests allowed on the ride?

A  $h \geq 42\frac{1}{2}$

B  $h > 42\frac{1}{2}$

C  $h \geq 43$

D  $h > 43$

Consider the statement below.

4.

*More than 20 students participated in a drawing competition.*

Which number line *best* represents the statement?

5.

A topographic map of the park in Wolf Basin lists the elevation of the park ranger station as  $-21$  feet and the elevation of the park visitor center as  $-29$  feet. Which statement is true?

- A Since  $-29 < -21$ , the park ranger station is at a higher elevation than the park visitor center.
- B Since  $-29 > -21$ , the park ranger station is at a higher elevation than the park visitor center.
- C Since  $-29 < -21$ , the park visitor center is at a higher elevation than the park ranger station.
- D Since  $-29 > -21$ , the park visitor center is at a higher elevation than the park ranger station.
