

Name: _____
Ms. Napolitano

Date: _____
Order of Operations

Day 3 **Homework**

I can write and evaluate numerical expressions involving whole-number exponents.

Directions: Evaluate the following expressions below.

$$10 \times 8^3 + 14$$

$$10^2 \div 5 \times 2$$

$$80 - 16 + 6^2$$

$$4^3 + 72 \div 12$$

$$28 + 9^2 \times 5$$

$$108 \div 27 + 7^3$$

$$6^3 + 56 - 49$$

$$45 \times 2 \div 3^2$$

$$\{56 - 7 + 8\} + 5^3$$

$$839 - (48 \div 12 + 5)^3$$

$$9 \times 6^3 - [215 \div 5]$$

$$7^2 - \{72 \div 4\} + 32$$

$$171 + 125 - (102 \div 6)^2$$

$$[82 + 17] + 9^2 \times 8$$
