Name D	ate (	Class					
Forces • Review and Reinforce							
Newton's First and Se	cond Laws						
Understanding Main Ideas							
Answer the following question in the space	provided.						
1. Newton's second law of motion des mass, and acceleration. Write the eq		ng force,					
Write the letter of the correct answer on the	line at the left.						
2. If you increase the force on a	n object, its acceleration						
<ul><li>a. decreases.</li><li>c. also increases.</li></ul>	<ul><li>b. stays the same.</li><li>d. stops.</li></ul>						
<b>3.</b> If you increase the mass on an object, its acceleration							
<ul><li>a. decreases.</li><li>c. also increases.</li></ul>	<ul><li>b. stays the same.</li><li>d. stops.</li></ul>						
4. How much force is needed to accelerate a 3 kg skateboard at $5 \text{ m/s}^2$ ?							
<b>a.</b> 8 N <b>c.</b> 1.6 N	<b>b.</b> 0.6 N <b>d.</b> 15 N						
5. A resistance to a change in m	<b>5.</b> A resistance to a change in motion is						
<ul><li>a. acceleration</li><li>c. gravity</li></ul>	<ul><li>b. inertia</li><li>d. velocity</li></ul>						
<b>6.</b> The amount of inertia an objection	6. The amount of inertia an object has depends on its						
<ul><li>a. speed</li><li>c. mass</li></ul>	<ul><li>b. volume</li><li>d. length</li></ul>						
Building Vocabulary Skills							

 $Answer\ the\ following\ question\ in\ the\ space\ provided.$ 

7.	Define the term <i>inertia</i> .
