Paleolithic
Tools of the Paleolithic and Neolithic Ages

During these periods, early humans used a variety of technology to match their life style. Most tools were made of stone, since this was the main resource of the environment. For this project you are required to research and make a tool ^{that} ~~the~~ was used during these two ^{ages} ~~ags~~.

You are required to:

- 1 Research the *what, when, where, why, and how* of the tool
- 2 Make or build the tool from local materials in your environment – paper, cloth, string, plastic, clay, etc (choose wisely)
- 3 Write a detailed description of the tool – 1 page or less (cite your source)
- 4 Bring both the tool you made and the complete description of the tool on
